Re: Groundwater Data Submittal of July 30, 1987
South Cavalcade Site

Dear Ms. Craig:

I have received and reviewed the groundwater data for wells GW-02 and GW-06. My observations are as follows:

GW-06 - - - ppt PHA's - - - no detectable concentrations
GW-02 - - - ppt PHA's - - - no detectable concentrations
GW-02 - - - ppb other - - - no detectable concentrations

According with your previous agreement with Mark Potts, the former RPM, the second round of samples will be analyzed at the ppb level for acid/base/neutral extractables and priority metals without cyanide. I understand that these samples were collected on August 4, 1987.

Sincerely yours,

James F. Pendergast, P.E.
Remedial Project Manager
